

Adela Vitkovska, experienced manager

This guide is a highly supportive tool for school managers and leadership teams. It combines strategic vision with practical approaches, supporting both organisational and pedagogical transformation. Its helps to strengthen the continuous learning, distributed leadership, and global networking positions of schools for sustainable excellence. For maximum impact, managers should supplement the guide with targeted change management strategies and ensure resource alignment for implementation.

It might be helpful to add visualisations to most complex topics to make the guideline easier to understand and work with.
