

Vanda Novoksonova, management and organisational quality expert

This document is a great resource for school leaders and educational managers wanting to implement systemic approach and transform their institutions into SMART Learning Organisations. Structured frameworks, continuous professional development, and global networking makes it a forward-thinking guide.

The strengths of this guide are: holistic approach, practical usable frameworks, pedagogical innovation and empowerment of educators.

A practical options and specific implementation strategies guideline could improve the applicability even more and this might be another supportive document to be developed in future.
